SUMMARY

Final-year B.Tech Computer Science (Data Science) student at Galgotias College of Engineering and Technology, graduating June 2027, seeking a backend or AI internship or fresher role. I build RAG and agentic AI systems with Python, FastAPI, LangGraph and Qdrant - proven by ShopSmart, a deployed RAG e-commerce assistant with hybrid retrieval and a LangGraph agent.

EXPERIENCE

Independent AI Developer - RAG E-commerce Assistant (ShopSmart) [LINK] [VIDEO] *2026*

- Built and deployed an end-to-end RAG product assistant over Amazon product data: **hybrid BM25 + dense retrieval** in Qdrant with **Reciprocal Rank Fusion, Cohere reranking**, and structured, cited LLM outputs.
- Built a LangGraph / ReAct shopping agent with intent routing and conversation-aware queries, a FastAPI + React app, **PostgreSQL-backed cart**, and **LangSmith** tracing for LLM calls, latency and retrieval.
- Evaluated the RAG pipeline with **RAGAS** on 50 questions: **faithfulness 72.7 response relevancy 74.7%, context recall 78.2 and context precision 20.7**

Gnani AI Challenge - Voice-First Shopping Assistant [Github] [VIDEO] *2026*

- Building a voice layer on ShopSmart using Gnani Prisma v2.5 for speech-to-text and Timbre v2.5 for text-to-speech, with a feature freeze on 8 Nov 2026 and submission on 10 Nov 2026.

PROJECTS

SketchWaves - Real-Time Collaborative Whiteboard [LINK] *2025*

- Engineered a real-time collaborative whiteboard enabling concurrent multi-user sessions with low-latency canvas synchronization through WebSockets, supporting live drawing, shapes, text, and undo/redo functionality.
- Developed a full-stack application incorporating a React.js frontend, Node.js backend, and MongoDB for persistent session and drawing storage; utilized Docker for scalable and reproducible deployment.
- Implemented WebSocket-based room/session management and real-time scene synchronization for collaborative boards, with MongoDB persistence for board state.
- **Tools Used: React, Express, Tailwind CSS, MongoDB, Node.js, WebSocket, Perfect-Freehand, Roughjs**

Qwen3-4B Mathematical Reasoning Fine-Tuning (QLoRA) [Github] *2026*

- Fine-tuned Qwen3-4B for mathematical reasoning using QLoRA / PEFT, training LoRA adapters while keeping the base model quantised in 4-bit precision.
- Processed 2,000 OpenMathReasoning examples into Qwen chat-template format and tokenised them for supervised causal language-model training. **Tools: Hugging Face Transformers, PEFT, PyTorch, BitsAndBytes, Google Colab.**

TECHNICAL SKILLS

- **Programming Languages:** C++, Python , SQL
- **Frontend:** React.js, Tailwind CSS, Redux
- **Backend:** Node.js, Typescript, Redis, FastAPI, WebSocket .
- **Databases:** MongoDB, PostgreSQL, ChromaDB, Qdrant.
- **DevOps/Tools:** Git, GitHub, Postman, Docker, Kubernetes, AWS .
- **GenAi / Agentic AI :** LLMs, LangChain, LangGraph, Hugging Face, PEFT, (LoRA/QLoRA), RAG, Multi-Agent Systems, Pydantic, FAISS.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering (Data Science) *Sep 2023 - June 2027*
Galgotias College of Engineering and Technology, Greater Noida, India
Current SGPA: **7.7** *(Till 6th Semester)*

AWARDS & ACHIEVEMENTS

- Solved 1000+ DSA Problems across LeetCode,GFG and Codeforces Leetcode Rating 1800+
- Ranked In Top 2000 LeetCode Weekly Contest
